

DRAFT AGENDA
EPA/NYSDEC/NYSDOH/RCDOH
Interagency Technical Meeting Hoosick Falls
March 23, 2016

- 1.) Agency updates
 - a. DEC –
 - i. POETs: installation requests trailing off but still coming in. 768 requests to date, 82 cancellations (mostly because of their data being ND). 356 installed (complete systems) to date. More installed but not complete. Command post will be shut down over Easter weekend.
 - ii. Alternate water supply – 2nd location being investigated.
 - iii. Soil sampling - -gardens/farms: discussions with DOH and Ag and Markets led to selecting specific locations to test. No plan yet. Also rec'd questions on use of surface water, small tribs, creeks, for livestock - receptive to sampling those as well. Schedule - maybe a couple of weeks away
 - b. DOH - absent
 - c. EPA
 - i. HRS work - in field no later than 2nd full week of April
 - ii. Ballfields - All validated results in by next Friday. Will have data put into a more user friendly format for use by the team and ultimately public.
 - d. RCDOH
 - i. Continue to sample in the Petersburg area, couple more samples came in (7 add'l properties, one of which > 100). Two had PFOS, resampling to confirm. Both exceed 200 ppt in raw water, finished water was fine.
- 2.) Installation of temporary system
 - a. Data post-flushing of system – NYS issued a press release yesterday with results
- 3.) Outstanding public inquiries
 - a. Requests for assistance – Petersburg
 - i. Bill Daigle and DOH in Petersburg today @ Taconic Plastics
 - ii. Per RCDOH: 19 homes – Taconic is installing POETS, priority established by RCDOH based on sampling data. RCDOH will do post install inspection and sampling until DEC takes over, either through state resources or order with TP
- 4.) Other – still in negotiations with Taconic Plastic, maybe some soil sampling could be conducted in Petersburg concurrent with Hoosick event. TBD
